Recommendations

Academic Performance

Introduce targeted academic support programs (mentorship, tutoring) to improve the extremely low first-class rate (0.23%).

Faculty Balancing

Investigate underperforming faculties (e.g., Law, ACETEL) to identify structural issues such as low enrolment, program availability, or reporting gaps.

Programme Optimization

Expand high-demand programmes (e.g., Nursing, Business Admin) while reviewing low-performing programmes for restructuring or improvement.

Postgraduate Growth

Develop strategies to increase postgraduate enrolment to balance the academic structure and improve institutional reputation.

Beyond visualization, I focused on identifying performance gaps particularly the extremely low first-class rate and faculty imbalances and provided recommendations that can directly improve academic outcomes and planning
